

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

<i>Quotations:—</i>	
<i>The Organization of Research in Great Britain</i> .....	29
<i>Special Articles:—</i>	
<i>The Relation of the Sector Opening of the Sector Photometer to the Extinction of Co-efficient: DR. H. S. NEWCOMER</i> .....	241
<i>The American Association of Variable Star Observers: L. C.</i> .....	243

MSS. intended for publication and books, etc., intended for review should be sent to The Editor of Science, Garrison-on-Hudson, N. Y.

## THE MEASUREMENT AND UTILIZATION OF BRAIN POWER IN THE ARMY<sup>1</sup>

*History of Psychological Service.*—The psychologists of America, of whom upward of two hundred served in the Army or Navy, have rendered conspicuously important assistance to the government in organizing an efficient fighting machine. Chief among the civilian agencies responsible for the development of this new and unexpectedly significant variety of service are the American Psychological Association and the Psychology Committee of the National Research Council. Nearly a score of committees or subcommittees of these organizations functioned during the military emergency.

Within the Army three principal groups of psychologists appear: one attached to the Office of The Adjutant General of the Army (specifically known as the Committee on Classification of Personnel in the Army), another in the Office of the Surgeon General of the Army (known as the Division of Psychology of the Medical Department), and a third in the Division of Military Aeronautics (the Psychological Section of the Medical Research Board). Although the several tasks of these groups of psychologists differed markedly, the primary purpose of each was the increase of military efficiency through improved placement with respect alike to occupational and mental classifications.

<sup>1</sup> Published with the approval of the Surgeon-General of the Army, from the Section of Psychology, Office of the Surgeon-General, Major Robert M. Yerkes, Chief.
